

ICIS Intermountain Clinical Instrumentation Society

MEETING INVITATION

ICIS MISSION STATEMENT

The Intermountain Clinical Instrumentation Society has a long history of collaboration between healthcare organizations, independent service organizations, and consultants. Benefits to our members include networking with colleagues in field of technology repair, design, implementation, restoration, and design, implementation, restoration and design all in the support of patient safety and service.

THOSE INVITED

All individuals or groups dedicated to various aspects of clinical instrumentation support, health care devices, and other technical instrumentations used in clinical, medical and research organizations. Hospitals, clinics, laboratories, Manufactures, Universities, State or Federal facilities, etc.

WHERE AND WHEN

WHEN: August 04, 2011
WHERE: Riverton Hospital
 3741 West 12600 So.
 Riverton, UT 84065
 (801) 285-4000
 Meeting to be held in the "Herriman" Room

TIME: 6:00 P.M.

NOTE: A lite dinner will be provided.

SPECIAL APPRECIATION:

- IHC/Riverton Hospital
- RPI Replacement Parts Industries, Inc.

RPI - Replacement Parts Industries

PRESENTER: Neil Blagman, Product Development Engineer

This presentation will provide the history and current state of tabletop steam sterilization as well as basic information on the operation, repair, and maintenance of some of the most common tabletop sterilizers in use today. Troubleshooting tips, repair techniques and preventative maintenance will be a focal point of the presentation. In addition, a comparison between tabletop sterilizers and bulk sterilizers will be a lively part of the discussion.

Since 1972, Replacement Parts Industries, Inc. has provided BMET's, clinical engineers, facilities personnel and independent service technicians with an alternate source for obtaining quality replacement parts for new and obsolete medical equipment, hospital equipment, dental equipment, and laboratory equipment.

RPI has gained an international reputation for quality parts and unparalleled customer service. Professionals around the world who repair and maintain healthcare equipment have come to rely on RPI as the leader in replacement parts.

Joe Divito - Vice President ICIS

In an effort to develop a more cooperative environment within the organization, We'd like to spend a little time in our quarterly meetings discussing various topics that may be of interest to the group as a whole. Here are some examples, and we can start with these during our next meeting in August.

1. National Biomed Appreciation week was just celebrated in May. How was this advertised within your organization, and what did they do, if anything, to recognize you. Should ICIS, as a Biomed organization, do anything next year, as a group, to help celebrate this time next year.

2. A company that provides Ultrasound training is willing to come to Utah to conduct classes if there are enough students to attend. Is anyone interested (and your organization willing to pay for) in attending, and when would be the most convenient time?

3. How do you measure PM completion rates? What factors do you take into account, such as items not located. Do they count against you or not, and at what point do you retire the equipment, and cancel the WO? (i.e., two PM cycles without locating the item).

These are just examples, and anyone that has a topic that they wish to have discussed can contact a myself, or any member of the board. We'll try to vary the subjects, as some topics will only be of interest to a specific group, like management.

Sincerely, Joe Divito VP ICIS
